

Sage Class Year: 2000

College and Grad Year:

The George Washington University 2008

UMASS Medical School (anticipated) 2015

Major/Minor: International Affairs with Minors in Religion and Spanish.

Current Job: I am an EMT and a substitute teacher at Sage.

Hobbies: I hike or ski depending on the season, and I have a vegetable garden.

Career Goals: To be a primary care doctor.

Latest Feather in Your Cap: Recently accepted into The University of Massachusetts Medical School's Class of 2015.

Biggest Challenge in College: My biggest challenge was figuring out what I really wanted to do with my education. I started off college on a completely different educational track than I am on now. Eventually you find the right path.

The Transition from Sage to High School and College: Going from Sage to high school was a challenge because I was not used to the increased class size. The same thing happened on a much larger scale when I went to college. Making friends with other new students makes the process much smoother and a lot more fun.

Skills Sage Helped You Develop the Most: Sage encouraged me to pursue all of my interests with passion. I am a more well-rounded and curious person because of Sage.

Fondest Sage Memory: Reciting and performing "Jabberwocky" by Lewis Carroll on stage with my classmates is a memory that still makes me laugh and smile every time it crosses my mind. I think that I still remember most of the words.

Words of Advice to Sage 8th Graders Preparing for the Next Step: : If you keep your eyes open for opportunities that strike some particular chord in you and take them when they arrive, life will be an adventure. It is important to make plans and to be okay with changing those plans. It makes every day more exciting.

Shout-outs: Well, it is hard to give anyone in particular a shout-out because I am still in contact with Sage so often. Instead I will just say thank you to all of you who make up Sage. You are still such an important part of my life and I treasure the chance to remain part of the Sage community.
